

DigitAll **technology**

In 1981, the world of technology went into overdrive. As the modern era of computers took off, Samsung launched its monitor division. Since then, our monitors have proven to be extraordinary, offering the most innovative features and functionality available to ensure that you get a true return on your investment and maximum value.

No matter what you require from your monitor, there's a Samsung TFT flat panel monitor that will deliver the sophisticated, cutting-edge solution you need.

Samsung's flat panel monitors offer the most outstanding color gamut available for brilliant, bold colors that maintain depth and richness. With colors this dazzling, the competition pales in comparison.

Samsung's patented PVA Technology (Patterned multiple domain Vertical Alignment) is clearly one of the most exciting new leaps in digital monitor development. Liquid crystal cells are aligned in such a way that viewing angles are wider than with any other screen technology, a full and clear 170 degrees. In addition, the screen also features superior contrast and response time with excellent transmittance.

Samsung TFT Monitors are VESA-compatible so they can be easily wall-mounted.

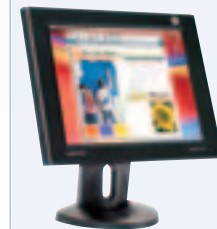

So, go ahead, demand a monitor that pushes technology farther than it's ever gone before. With Samsung, the possibilities are endless, because we don't just manufacture technology — we define it.

With a selectable 24-step image enhancement filter, you can customize your viewing experience to your applications and taste.

The Samsung SyncMaster 171S TFT combines value and low power consumption in one great monitor.

Do More With Samsung Multi-function LCD Monitors

Multi-function LCD Series

You'll never be limited by your monitor again. Samsung's revolutionary Multi-function Series monitors deliver TV, video, and computer monitor capabilities from a single sleek device. And all this versatility comes with the sharpest images, clearest pictures and most brilliant colors possible.

Samsung TFT-LCD monitors offer a slim design that gives you plenty of viewing space without taking up a lot of desk space.

Portrait or landscape. It's your choice with Samsung Pivot Technology.

241MP

This 24" 4-in-1 display offers a TV tuner, HD-TV ready component, video and analog inputs in one slim flat panel.

211MP

This large, slim 21" HDTV-ready display shares the same features as its 24" cousin, but is slightly smaller with full range integral speakers.

171MP

This lightweight display's ultra-portable design can be placed on a desk or wall mounted to save space.

151MP

There's no limit to what you can do (or where you can go) with the portable luxury of the 151MP.

170MP

The 170MP is a VGA/RGB computer monitor with Picture-in-Picture, NTSC/S-video inputs and a built-in TV tuner.

150MP

The 150MP is a 3-in-1 display that provides razor-sharp images and brilliant colors for all applications.

Cutting-Edge Monitors for Home, Home Office, and Office

Digital/Analog LCD Series

Sleek designs. Slim footprints. Flat screens. Unbelievable color and clarity. Perfect digital quality.

The SyncMaster Digital/Analog LCD Series delivers the highest quality images possible with dual analog and digital source inputs, producing crisp, clean video images and colors that pop.

With completely flat image areas, the Digital/Analog LCD Series provides images that are distortion free.

And with revolutionary Picture-in-Picture capability for full-size viewing of two different input sources full-screen, simultaneously, your productivity will grow by leaps and bounds.

Check stocks. Watch surgical procedures. Create extensive spreadsheets. Develop layered graphics. When you live in a Samsung world, there's no limit to what you can accomplish.

DIGITAL & ANALOG SERIES

240T

From CAD/CAM drawings to creating extensively layered graphics this monitor delivers larger than life performance.

210T

The versatile 210T offers an array of features including PIP, auto adjustment and precision color control.

171P

The F. A. Porsche designed 171P's Digital Video Interface guarantees sharper images and more accurate video reproduction.

151P

The F. A. Porsche designed 151P offers digital/analog inputs, a 450:1 contrast ratio and 1024 x 768 maximum resolution.

From F. A. Porsche Digital/Analog LCDs to affordable Analog LCDs — compromise is not part of the picture.

F. A. Porsche Design

One look at the Samsung 171P explains why it's earning top honors including an 8 out of 10 rating from *CNET* who says this display is "...as much a business tool as a desktop trophy." It was also praised for its "stellar image quality." *PC Magazine* advised its readers to put the 171P "...at the top of your list."

Closely following this new tradition of excellence is the slightly smaller 151P with a 15" screen, tack-sharp image and elegant Porsche lines.

Analog LCD Series

From the corporate office to the home office, our analog LCDs deliver high contrast, crisp text and lightning fast response time — all in an ultra-slim, lightweight design.

The brilliant color, razor-sharp image clarity and superior image quality of these cutting-edge monitors let you set your imagination free — while saving valuable space on your desktop.

These displays save more than space. They could also save your budget. Let others compromise: we'd rather maximize your investment.

While Samsung creates some of the most advanced products in the world, there's something refreshingly classic about how things get done. Our products aren't just built, they're built around you. We make many of our own components, instead of shopping them out. We also work closely with other companies who share our commitment to excellence. Tight control like this improves your output, lowers costs and makes sure you get the quality you expect. It's technology with craftsmanship. ■

“Samsung's SyncMaster 241MP is the ultimate presentation powerhouse.”
